Finloop Collaborates with Anchorpoint and QFPay HK on Hong Kong Payment Applications for the Regulated HKD Stablecoin HKDAP

Hong Kong, 16 October 2026 — Finloop Finance Technology Holding Limited (“Finloop”), an AI-driven global one-stop wealth technology platform, announced that its subsidiary Finloop Finance Limited (“Finloop Finance”) has entered into a tripartite collaboration with Anchorpoint Financial Limited (“Anchorpoint”), a Hong Kong-licensed stablecoin issuer, and QFPay Haojin Fintech Limited (“QFPay HK”), a leading digital payment service provider in Hong Kong. As part of the collaboration, Finloop Finance and QFPay HK have completed a payment transaction using HKDAP, Hong Kong’s regulated HKD-backed stablecoin, demonstrating its application within local payment and settlement processes.

Anchorpoint is among the first licensed stablecoin issuers by the Hong Kong Monetary Authority under the Stablecoins Ordinance. As an authorised distributor of HKDAP via Beta Access, Finloop Finance can provide HKDAP subscription, redemption, exchange, trading and settlement services. Working together, Finloop Finance and QFPay HK have developed a digital asset payment solution that allows merchants to accept HKDAP and other compliant digital assets, while maintaining their existing HKD settlement workflow.

The collaboration provides a foundation for further exploration of HKDAP within local payment activities. Going forward, the parties will continue to strengthen operational processes within a robust compliance framework and assess additional applications for regulated digital money across payment and settlement workflows. The collaboration broadens the range of digital payment options available to merchants and supports access to a growing base of digital asset users, while contributing to the continued development of Hong Kong’s digital financial infrastructure.

Cai Hua, CEO of Finloop, said: “Teaming up with Anchorpoint and QFPay HK is a key move for Finloop in taking the HKDAP ecosystem into real commercial use. We not only provide compliant conversion and liquidity support, but are also committed to extending the stablecoin value into everyday transactions and enterprise payments. Going forward, we will continue to improve the transaction experience and work with partners to explore HKDAP deployment in more practical scenarios, so that compliant digital assets genuinely serve real-world commercial needs.”

Will Leung, Co-Founder and General Manager of QFPay HK, said: “This collaboration goes beyond simply adding another payment method — it marks a meaningful expansion of QFPay’s payment infrastructure capabilities. By joining forces with Anchorpoint and Finloop, we aim to provide Hong Kong’s retail and cross-border commerce landscape with yet another compliant payment option, furthering the long-term growth of the local digital asset ecosystem.”

Dominic Maffei, Chief Executive Officer and Co-Founder of Anchorpoint, said: “The development of tokenised money depends not only on regulatory certainty and technological innovation, but also on how easily it can be accessed and used within everyday payment processes. Through this collaboration, HKDAP can be integrated into established payment workflows in a practical and compliant manner, helping to broaden access to regulated digital money for businesses and consumers alike. We look forward to working with Finloop Finance and QFPay HK to support broader access to and adoption of regulated tokenised money in Hong Kong.”

About Anchorpoint

Anchorpoint Financial Limited is a subsidiary of Standard Chartered Bank (Hong Kong) Limited (SCBHK) and a joint venture established by SCBHK, HKT, and Animoca Brands in February 2025. With the vision of utilising tokenised money to rewire and supplement existing financial infrastructure for the betterment of the real economy, the initial goal is to build and advance the regulated HKD stablecoin “HKDAP” to serve as a secure tokenised medium of exchange for digital economy and to facilitate international payments and capital flows. It is one of the first entities granted with a stablecoin issuer licence (licence number FRS01) by the Hong Kong Monetary Authority under the Stablecoins Ordinance in April 2026.
